SUMMARY

I am a junior Developer aspiring to enter the work of software development to excel at delivering elegant solutions with speed and precision. I am very passionate about software development and my expertise in software development makes me very confident with my current abilities. I am capable of learning new software development technologies within the shortest time possible. My ability to work in a team is excellent and I have collaborated on several projects with my friends. I am very eager to take on new challenges in software development so that I can sharpen my skills and expertise to handle and solve problems using technology and also to advance my career and be a valuable asset in any software development team.

SKILLS

- HTML
- CSS
- JavaScript
- ReactJS
- Ruby
- Ruby on Rails
- Tailwind CSS
- Bootstrap
- SQL
- PostgreSQL
- Git

PROJECTS

IReporter - https://ireport-eight.vercel.app/

Web application that enables users to report incidences of corruption and red flags. The user can view all the reports that are already reported by all the users even without an account. When the user creates an account the user can report an incident by choosing whether it's a red flag or a corruption incident. The user describes the incident and uploads a picture of the incident. The user also indicates the exact place where the incident has taken place using the GPS and the place is shown on a google map. The incident reported has three status which is changed by the

admin that is pending, under investigation and completed. When the status changes the user can see on his/her side and can only edit the incident if the status is not completed.

Food website - https://visionary-haupia-d2070d.netlify.app/
Web application that displays different sit foods that a restaurant cooks at different times of a day. The user can sort the food by either category or price.

EDUCATION

Chuka University | Bachelor of Science in Applied Computer Science   September 2018-October 2022

- Second class upper

Moringa School | Software Engineering   November 2022- June 2023
